

EPA registration numbers for trait packages on the Handy Bt Trait Table Updated March 2024

Just like pesticides, all Bt trait packages in the U.S. have EPA registration numbers. Knowing these numbers can unlock all sorts of historical information on Bt corn in government records and databases. In the list below, the first part of the registration number indicates the original registrant for the package [524 Monsanto; 29964 Pioneer Hi-Bred; 62719 Corteva Agriscience; 67979 Syngenta Seeds; 68467 Mycogen Seeds].
